Homepage, GitHub

SKILLS

Imitation learning with NeRF-enhanced demonstrations

Visual autoregressive modeling

Deep reinforcement learning

ManiSkill 3 and RLBench

Numerical and analytical solver development for PDEs in mechanics

Multiphysics and multiscale modeling

EDUCATION

University of Pittsburgh (Pitt), Pennsylvania 2022–2024
PhD Student (Voluntarily Withdrawn to Pursue a Career in Artificial Intelligence)
Focus: Computational Mechanics (supervised research) and Machine Learning (independent research)
GPA: 4.0/4.0 (43 credit hours)
Graduate Courses: Introduction to Machine Learning (at Carnegie Mellon University via cross-registration); Mathematics of Data-Enabled Science and Engineering; among others

Computer Science College Credits through ACE and Thomas Edison State University 2024
Average Grade: 93.8/100 (12 credit hours)
Undergraduate Courses (transcript link): Operating Systems; Computer Architecture; Discrete Mathematics; Network System Design

Shanghai Jiao Tong University (SJTU, top 4 in China), Shanghai, China 2019–2022
M.S. in Civil Engineering
GPA: 3.76/4.0 (Rank: 2nd out of 29)

Huazhong University of Science and Technology (HUST, top 8 in China), Wuhan, China 2015–2019
B.Eng. in Civil Engineering
GPA for second to fourth years: 3.91/4.0 (Rank: 2nd out of 86)
My first-year grades were not strong due to health challenges
Courses (Grades): Probability Theory and Mathematical Statistics (99/100); Numerical Methods (94/100); Advanced Programming Language (C++) (91/100); Database System Technology and Applications (94/100)

National University of Singapore (NUS), Singapore Summer 2018
Summer Program: "Issues in Infrastructural Development in Singapore"

Exceptional Performance at China National College Entrance Examination (top 0.3%) 2015

HONORS & AWARDS https://donggejia.github.io/docs_store/Honors.pdf

Ministry of Education of China, 1 Global Gold Award (top 0.1%) + 2 Shanghai Gold Award (top 1%) in the China International College Students' Innovation Competition (Project 1: Digital Twin System for Bridge Maintenance; Project 2: Modified Carbon Fiber Mineral-based Reinforcements), 2024

SJTU, COSCO SHIPPING Scholarship (top 2.5%), 2021

SJTU, Yuqiu Yang Scholarship (top 2.5%), 2020

SJTU, Qingyang Jin Scholarship (top 3%), 2020

SJTU, First-Class Research Fellowship, 2019, 2020, 2021 (three times)

HUST, Outstanding Graduate, 2019

HUST, **Star of Learning and Innovation** (top 0.5%), 2018

HUST, **Merit Student** (top 3%), 2017, 2018 (twice)
Ministry of Education of China, **National Encouragement Scholarship** (top 3%), 2017, 2018 (twice)
HUST, Excellent Student Cadre, 2017, 2018 (twice)
HUST, Excellent College Assistantship, 2017
HUST, Excellent Singer, 2016

RESEARCH EXPERIENCES https://donggejia.github.io/

Imitation Learning for Generalizable Visuomotor Control 2024
Designed a generalizable neural feature field (GNF) to reconstruct 3D voxel-based demonstrations enriched with semantic understanding;
Developed the next-scale vision-language modeling of GNF for multi-task robotic policy learning.

Task Offloading for Networked UAVs Using Deep Reinforcement Learning 2024
Developed deep reinforcement learning algorithms—TD3, PPO, and DDPG—for task offloading among UAVs.

Landmark Localization in Medical Images 2024
Implemented a convolutional SpatialConfiguration-Net (SCN) model for accurate hand joint localization and labeling.

Solving PDEs for Thermal-Mechanical Modeling of Cervical Spine, Concrete, and Soft Soil 2018–2023
Conducted inverse property optimizations for the biomechanical modeling of cervical spine;
Created efficient solutions for the thermal-mechanical modeling of concrete and soft clay.

PROGRAMMING

Proficient in PyTorch, Python, Julia, C++, MATLAB, and Mathematica
Familiar with VBA, SQL, and Fortran

Developed three open-source software tools, available on my GitHub repository:

LDPMLab

The first open-source, multi-functional Julia package for the Lattice Discrete Particle Model, integrating my work in multiphysics modeling and featuring both static and dynamic solvers

SpatialConfiguration-Net Using PyTorch

An efficient implementation of SpatialConfiguration-Net with a more structured and concise codebase

Calcusettlement

MATLAB-based software for calculating settlements of soft clay foundations under diverse dynamic loading conditions, incorporating different creep effects

INTERNSHIPS

Intern on the ExpandAI@SD Project (SDSURF & UCSD), California 2024

Researching imitation learning for robotic manipulation and deep reinforcement learning for task offloading among networked UAVs.

Computer Engineering Intern at Alibaba Cloud, Hangzhou, China Summer 2022

Developed a **Recurrent Neural Network (RNN)** model to predict energy consumption patterns in a server room of an Internet Data Center.

Industry Analysis Intern at China Industrial Securities, Shanghai, China Summer 2021

Conducted an in-depth analysis of post-COVID-19 real estate market trends in China and the US, identifying emerging opportunities and growth stocks.

SERVICE

Reviewer for Academic Journals, *IEEE Transactions on Systems, Man and Cybernetics: Systems; Computer-Aided Civil and Infrastructure Engineering*

Business Manager, International Engineering Students' Organization at Pitt 2024

Teaching Assistant, CEE 1330 - Introduction to Structural Analysis at Pitt Spring 2023

Group Leader, 10th Future Entrepreneur Training Camp at HUST 2018

Director, Publicity Department of the Student Union at HUST 2017–2018

CERTIFICATES

Alibaba Cloud Certifications: IT Technical Service; Data Center Infrastructure Engineering

China Computer Rank Certifications: Database Technology; C++; MySQL
